Welcome to **Driving Tracker**

Driving Tracker is an Android application designed to help drivers understand and improve their driving habits. Using your smartphone's sensors and an OBD-II vehicle adapter, the app records trips, monitors driving behaviour, and provides useful feedback such as safety scores, driving events, and vehicle information. Users can also share trips with trusted contacts, compare their driving performance with others, and participate in challenges to encourage safer driving.

Our Features

Smart Driving Tracker

Driving Tracker records your trips using your phone's GPS and sensors, tracking routes, speed, braking, acceleration, and cornering to provide insights into your driving habits.

Vehicle Diagnostics

Connect a compatible OBD-II adapter to view live vehicle information such as RPM, speed, engine temperature, and diagnostic fault codes.

Eco-Driving Insights

The app analyses your driving style and provides personalised tips to help improve fuel efficiency and reduce fuel consumption.

Safety Monitoring

Driving Tracker detects risky driving behaviours, calculates a Safety Score, and provides feedback to help you drive more safely.

Family & Friends Features

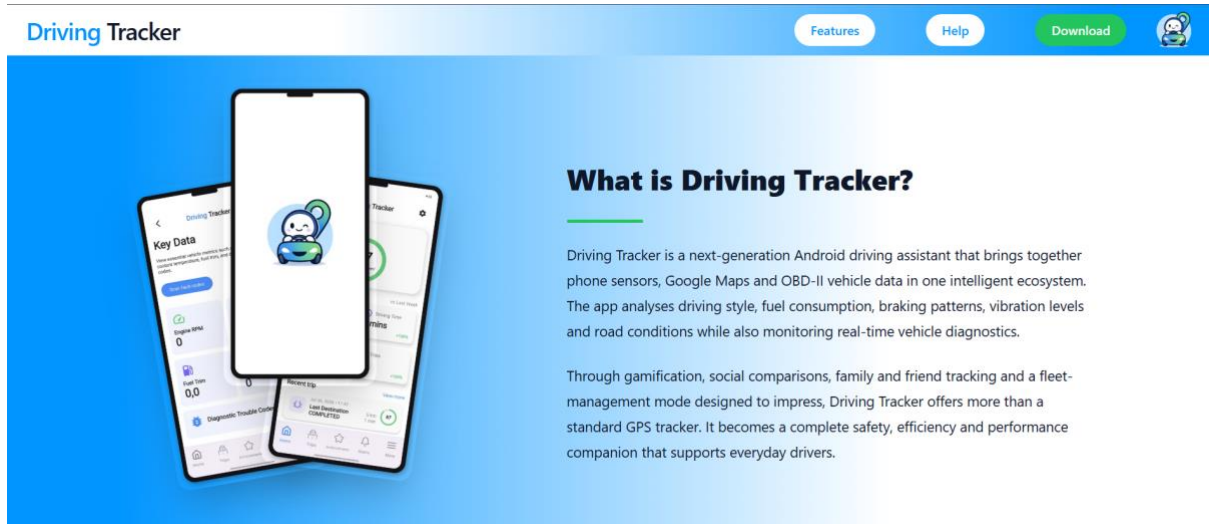

Share trips with trusted contacts and enable alerts for unusual events, helping friends and family stay informed during your journey.

Challenges and Achievements

Earn badges, complete driving challenges, and compare your performance with other drivers through leaderboards.

Installing the App

Go to our landing page and press Download on the top right of the page (if you are using a smaller device, then press the More option and then “Download”).

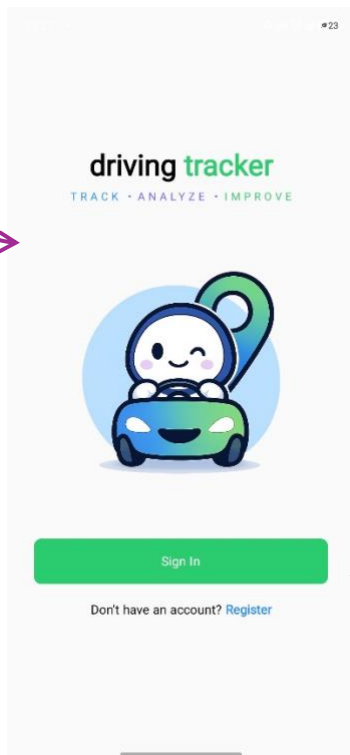

The APK should then start downloading.

When finished, press the app and open it.

Creating an Account/Logging In

After downloading the app, you will be met with a screen asking you to sign in. If you do not have an account, press “Register” and fill in all your details.

A screenshot of the 'driving tracker' app's sign-up form. The form is titled 'Sign Up' and contains several input fields: 'First Name', 'Surname', 'Email', 'Phone Number', 'Password', 'Confirm Password', and 'Date of Birth' (with sub-fields for DD, MM, and YYYY). There is a checkbox for 'I agree to the terms and conditions' and a green 'Sign Up' button at the bottom. A purple arrow points from the text above to the 'Sign Up' button.

When you finish and you are sure that all your information is correct, press the “**Sign Up**” button. You will then be automatically logged into our app.

If you **do have an account**, simply enter your email address and password and press the “**Sign in**” button.

Our Dashboard

Welcome to our app.

This is our dashboard, or simply put, our home page.

Here you will find your **Overall Driving Score**, which measures how safe your trips are.

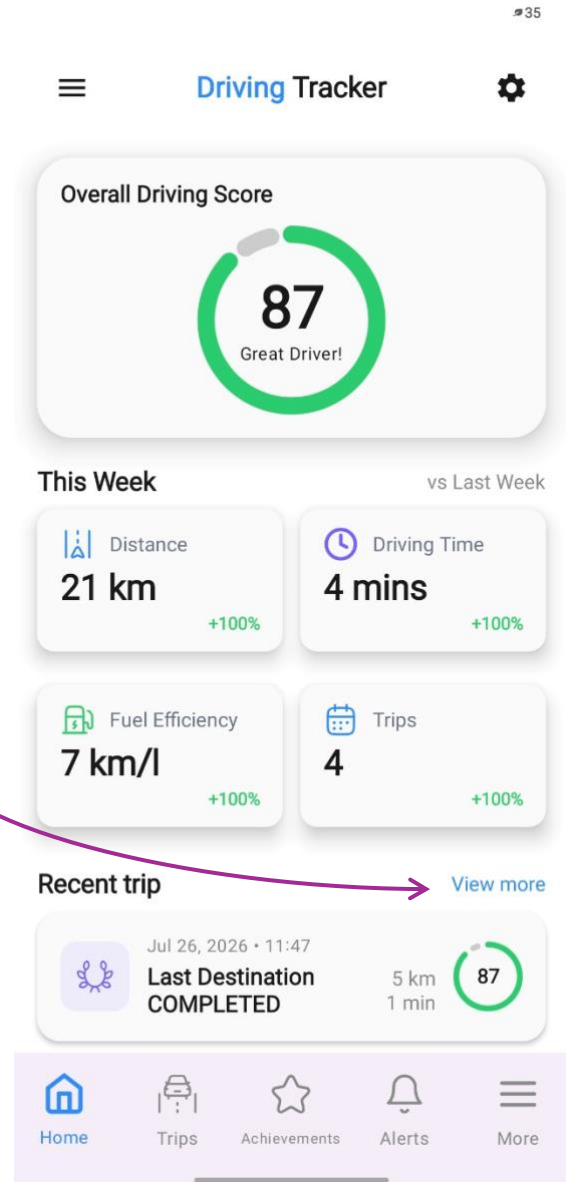

You can also find your **stats for the week**, such as the total distance driven, total driving time, fuel efficiency, and total trips taken.

You will also find your most **recent trip's stats**, as well as a “View More” button to learn more about that trip.

Last, but certainly not least, you will notice our **navbar**.

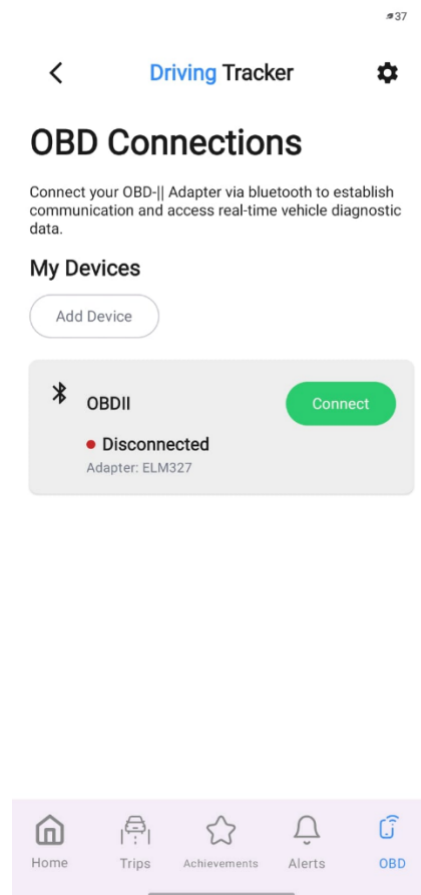

With this, you can see what page you are currently on (highlighted in blue) and what pages you can navigate to, which will be discussed later in this document..

Connecting an OBD-II Adapter

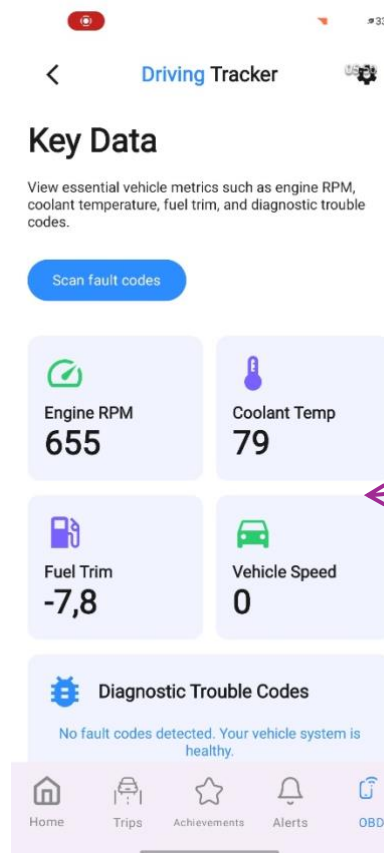

To access all of Driving Tracker's features, you will need a compatible **ELM327 OBD-II** Bluetooth adapter.

From the navigation bar, open the OBD page and select OBD Adapters. Tap **Add Device** to begin the setup process.

When prompted, allow the app to access your device's Bluetooth settings. Follow the on-screen instructions to locate and pair your adapter.

Once connected, the OBD Adapters page will display your device along with its current connection status.

You can also view OBD readings such as engine RPM, fuel trip and coolant temp as well as scan any faults by going to the key data page.

first trip

Ready to hit the road? Let's

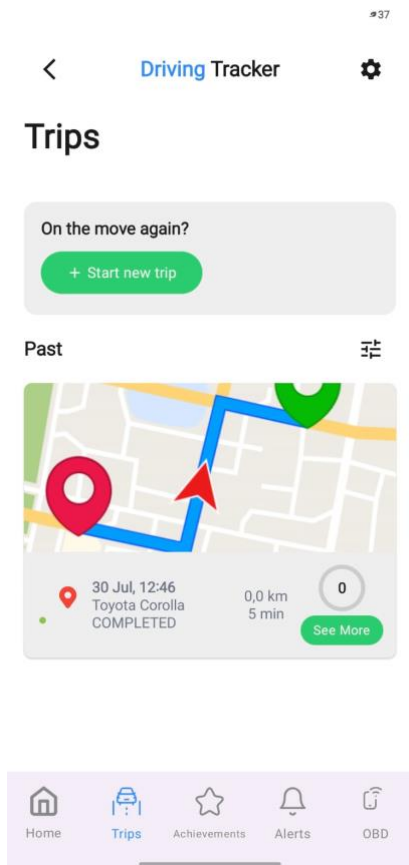

Open the **Trips** page from the

you'll find a list of your more information about a trip, simply select **See More** to open its summary.

Tracking your

start your first trip!

navigation bar. Here, previous trips. To view

To begin a new trip, tap **Start Trip** near the top of the screen. Before your journey begins, you'll be asked to:

- Select the vehicle you are driving.
- Choose your destination.
- Select any trusted contacts you would like to share your trip with.

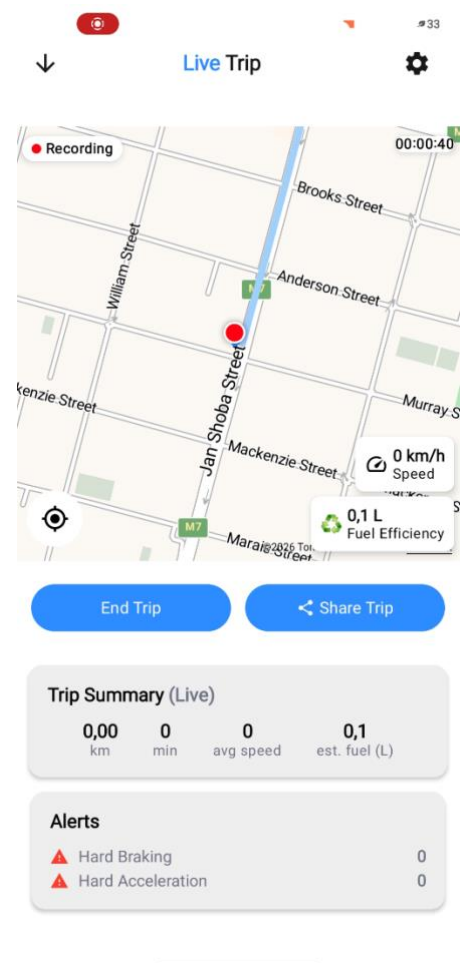

Once everything is set up, press **Start Trip** to begin navigation.

During your trip, the Live Trip screen displays useful information such as your current speed, estimated fuel usage, and driving alerts.

Alerts notify you of behaviours such as harsh braking or rapid acceleration. You can also add trusted contacts while the trip is in progress.

When you arrive at your destination, tap **End Trip**.

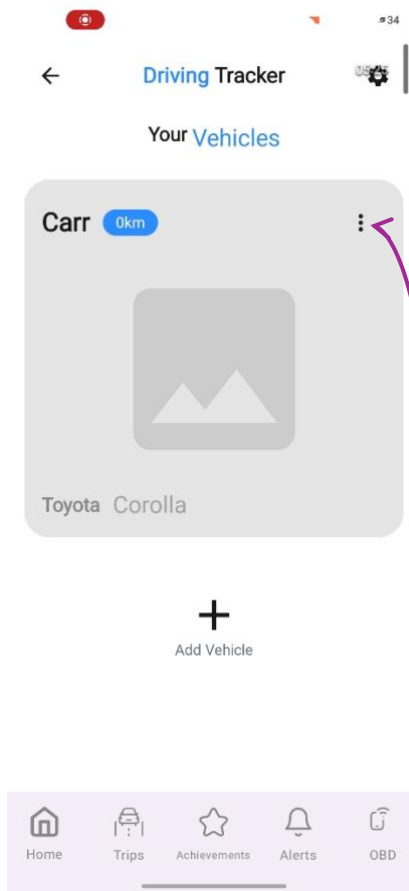

You will be returned to the Trips page, where your completed trip will appear at the top of the list.

Managing **your** Vehicles

The **Vehicles** page allows you to add and manage the vehicles you use for your trips.

To access it, open the **Dashboard**, tap **More**, and then select **Vehicles**.

When adding a vehicle, enter its **name (alias)**, **registration number**, **make**, **model**, **year**, and **fuel type**. This vehicle can then be selected whenever you start a new trip.

For the most accurate fuel consumption estimates, your vehicle should have a model year between **2015** and **2020**.

The Vehicles page also lets you:

- Edit your vehicle's information or nickname.
- View driving statistics such as **mileage**, **total trips**, **fuel efficiency**, and **service status**.
- Remove a vehicle if you no longer wish to use it.

This makes it easy to keep your vehicle information up to date and monitor its overall performance.

Navigating Contacts

To manage your contacts, open the **Dashboard**, tap the **More (≡)** menu in the top-left corner, and select **Contacts**.

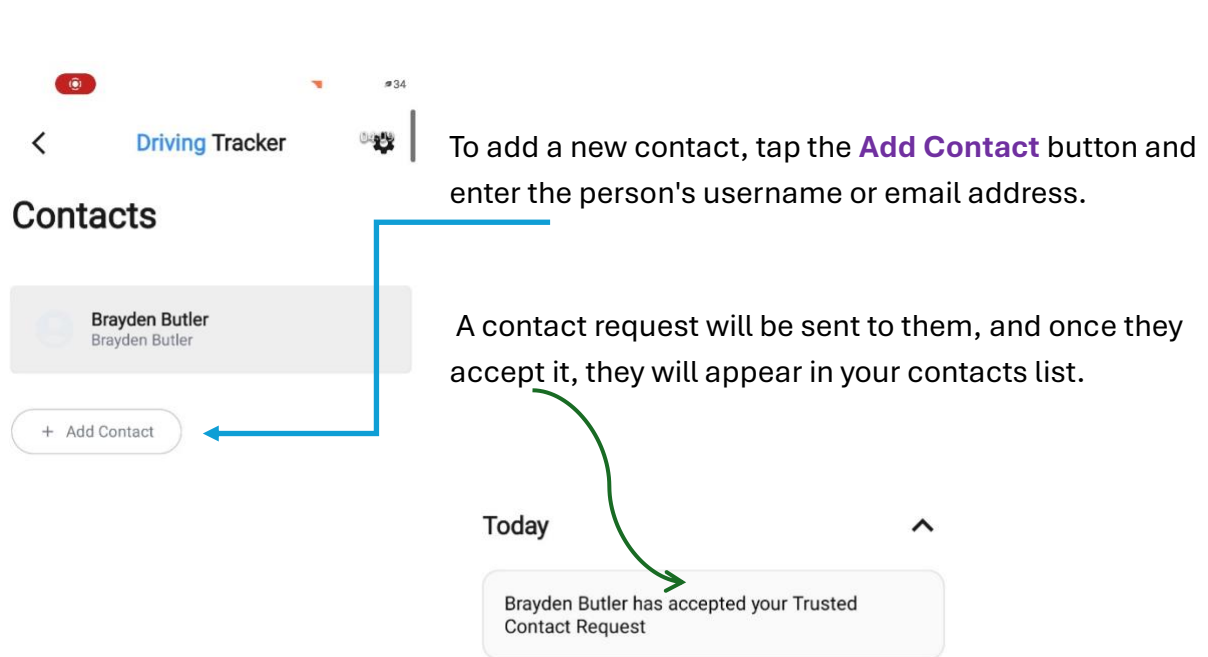

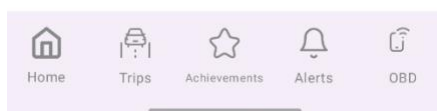

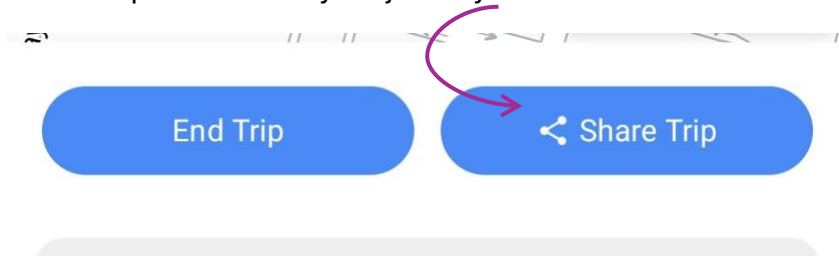

Figure 1 Accepted contact notification

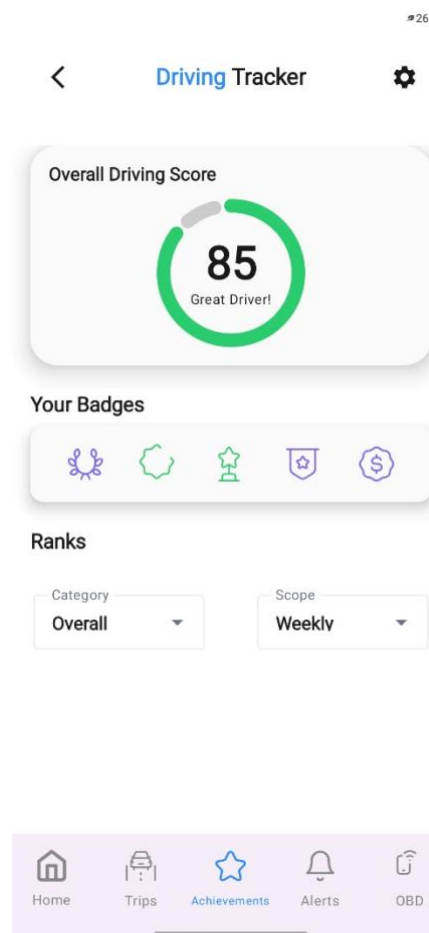

Trusted contacts can also be selected when starting or sharing a trip, allowing them to receive updates about your journey.

Achievements and Rankings

Ready to see how your driving stacks up?

Open the **Achievements** page from the navigation bar to view your progress and celebrate your accomplishments.

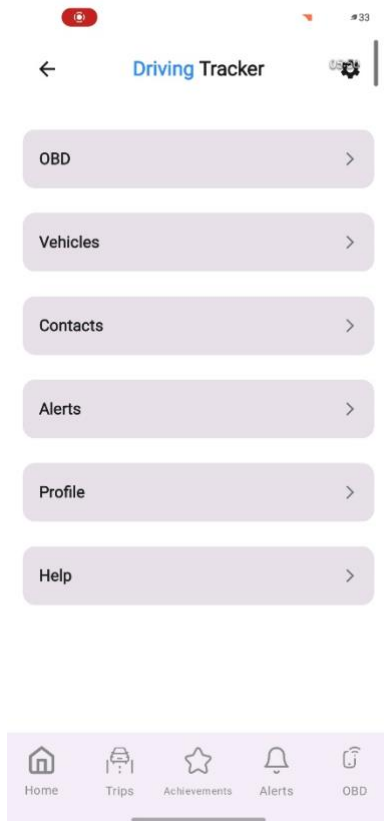

At the top of the page, you'll find your **overall Driving Score**, which reflects your driving habits across all of your trips. As you continue driving safely and complete challenges, you'll unlock **badges** that recognize your achievements and milestones.

Want to see how you compare with other drivers?

Scroll down to the **Leaderboards**, where you can view your ranking against other users. Use the available filters to compare your performance across different **categories**, such as safety or fuel efficiency, and adjust the **scope** to compete with friends, nearby drivers, or the wider community (depending on your selection).

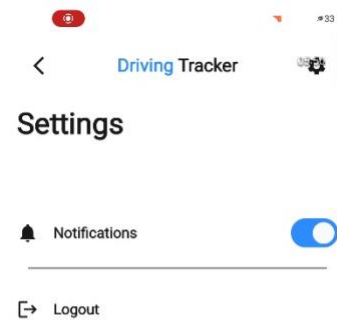

Keep an eye on this page as you complete more trips. Improving your driving habits can help you earn new badges, climb the rankings, and become one of the top drivers in the Driving Tracker community.

More & Settings

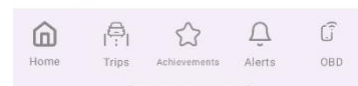

The **More** menu can be accessed from the Dashboard by tapping the  icon in the top-left corner.

From here, you can quickly navigate to additional pages, including **OBD**, **Vehicles**, **Contacts**, **Notifications**, **Profile**, and the **Help** page.

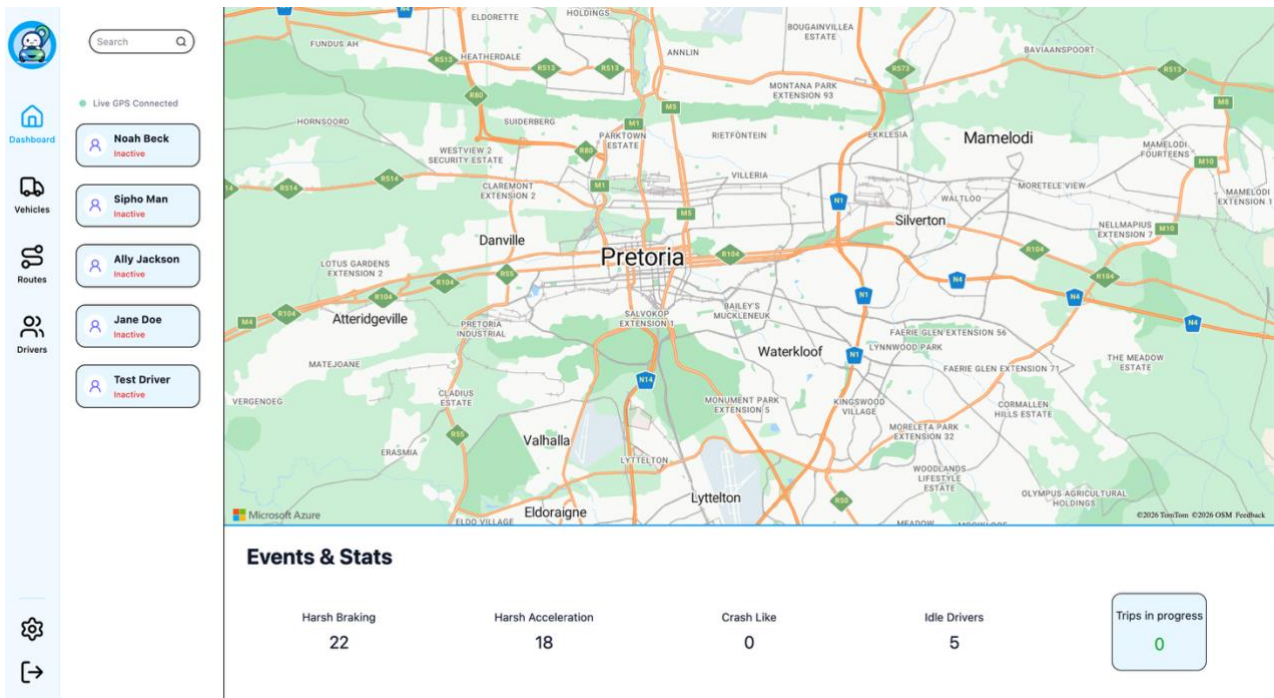

The **Settings** menu is available throughout the app and allows you to manage your account, log out, and enable or disable push notifications.

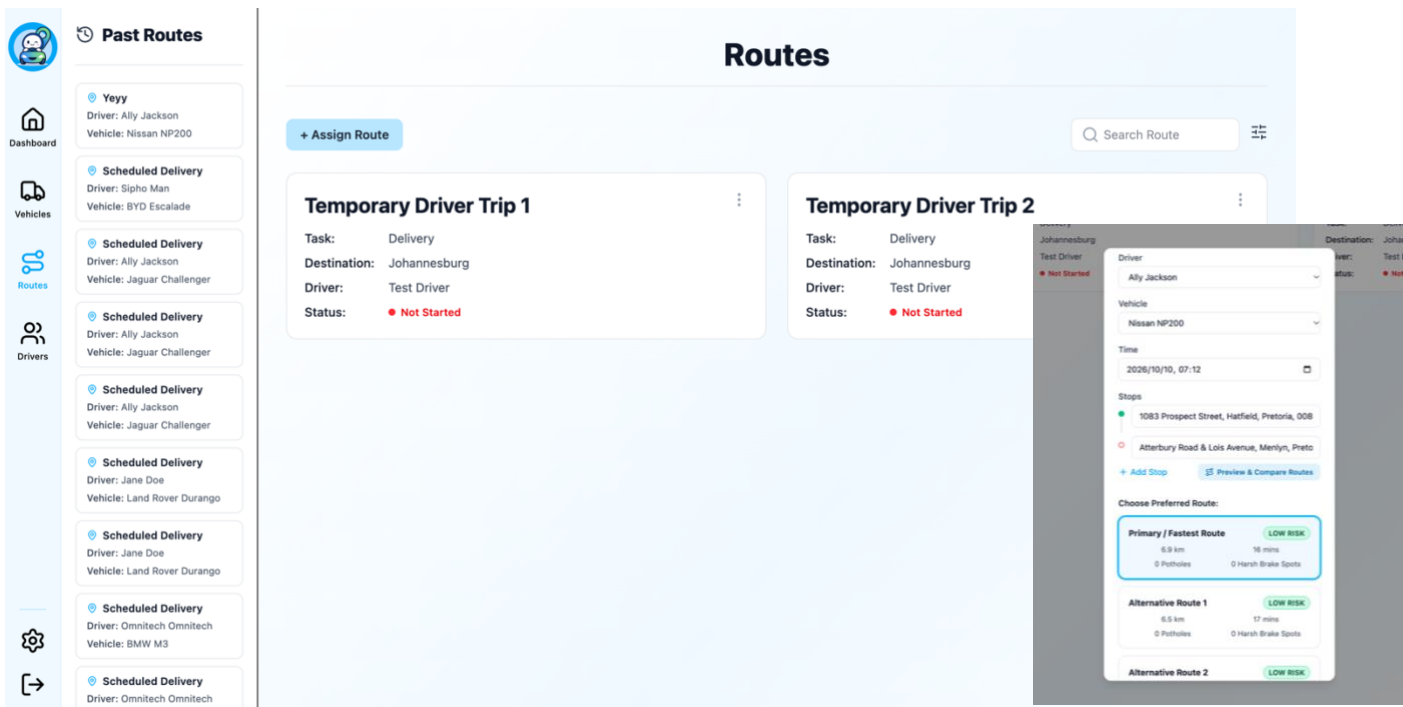

Fleet Dashboard

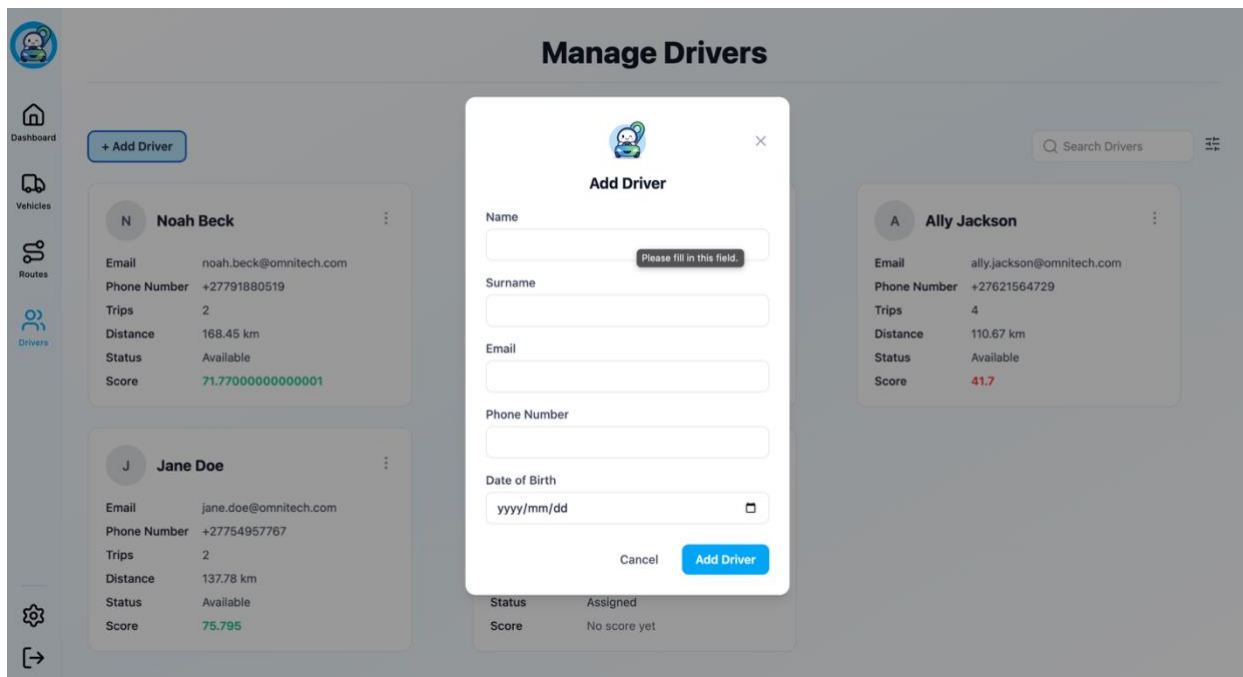

On our **Fleet dashboard**, you can view the map to see your drivers live locations, as a fleet manager, as well as event counts for the week, such as harsh acceleration and harsh braking.

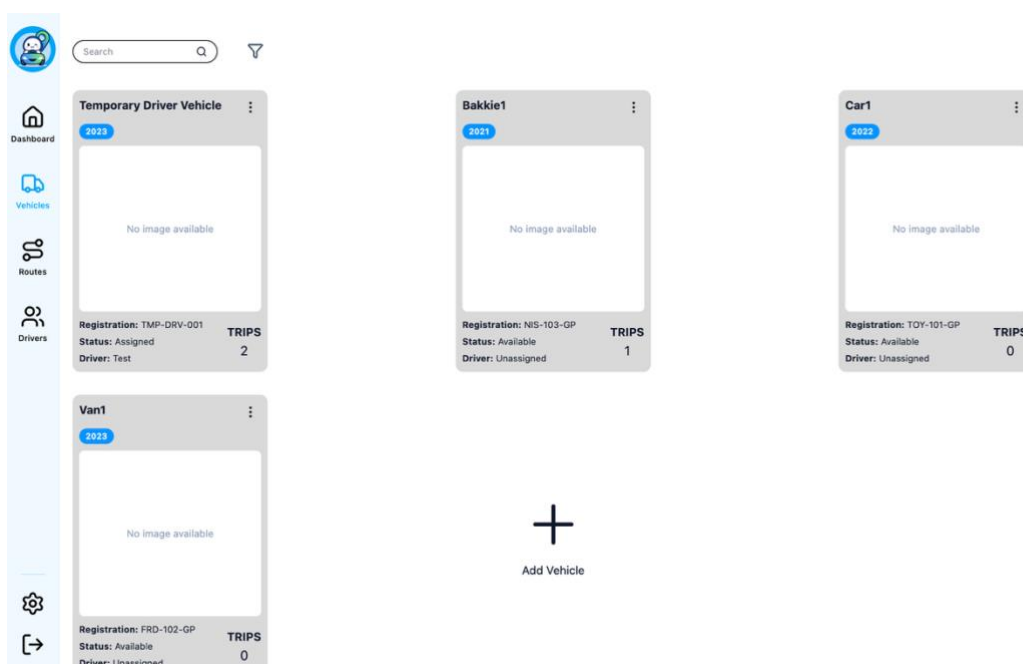

The **Routes** page, lets you create and assign a new route for one of your drivers by pressing the **Assign Route** button. You can include multiple stops, and the system will suggest alternative and possibly better routes based on hotspot and pothole frequency.

The **Drivers** page, lets you add new drivers to your fleet using the **Add Driver** button and view your current drivers.

The **Vehicles** page, lets you add new vehicles to your fleet using the **Add Vehicle** button and view your current vehicles. This includes the vehicle status as well as whether a driver is assigned.
