

Driving Tracker

Brand Style Guide

A clean, safety-first visual system built around readable metrics, calm surfaces, and bright accents for interaction and performance feedback.

Personality: Clean • Modern • Friendly

Motif: Score rings + card-based layout

Core accents: Blue • Purple • Green

Driving tracker is a mobile based system designed to monitor and improve driving behaviour by combining smartphone sensor data, GPS tracking, and vehicle diagnostics from an OBD device. The app records trips in real time, analysing factors such as speed, acceleration, braking, and route patterns to generate insights on safety and fuel efficiency. It assigns drivers scores based on their behaviour, provides feedback and recommendations for safer and more efficient driving, and can trigger alerts for risky events or unusual situations. In addition, it includes social and gamification features like leaderboards and comparisons, and supports a web-based fleet dashboard where multiple vehicles can be tracked, analysed, and managed centrally

TRACK • ANALYZE • IMPROVE

Colors

From `Color.kt` (tokens used across the UI)

Blue

#2D8CFF

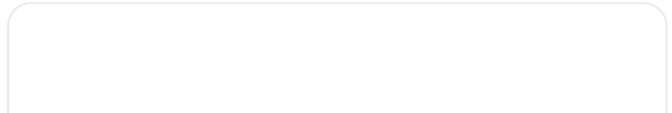

Purple

#7861FF

Green

#2ECC71

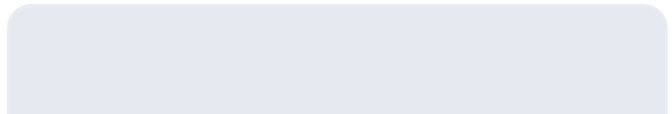

Background

#FFFFFF

CardWhite

#FAFAFA

Border

#E6EAF0

Usage: **Blue** for navigation & links, **Green** for score rings, **Purple** for secondary accents and some badges. Accessibility: ensure text on tinted backgrounds meets contrast expectations.

Typography

Matches `Type.kt` scale (Material 3)

Muted text

#9CA3AF

Labels

Logo & Iconography

Usage rules

Using the logo as the primary brand marker. Keeping it clear, readable, and consistent across screens and print.

Clear space

Rule

Keep padding around the logo equal to at least the height of the "t" in **tracker** Do not crowd with other UI elements.

Backgrounds

Rule

Prefer **white** or **CardWhite**. Avoiding placing the logo on busy images or strong gradients.

Icons

Rule

Use consistent icons (outlined/filled style consistently per screen). Accent icons may use **Blue/Purple/Green**; avoiding random colors not in the palette.

Accessibility: icons must have meaningful **alt** text.

Components

Standard component styling (buttons, cards, navigation)

Buttons

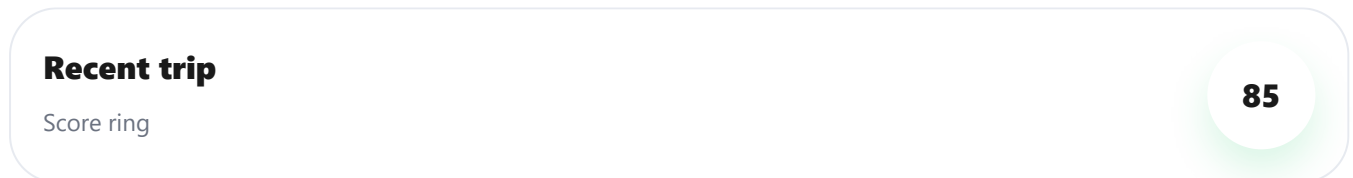

Primary actions use **Blue/Green** filled buttons. Secondary actions use **White** filled buttons with blue outline

Matches the auth screens: filled green for main CTA.

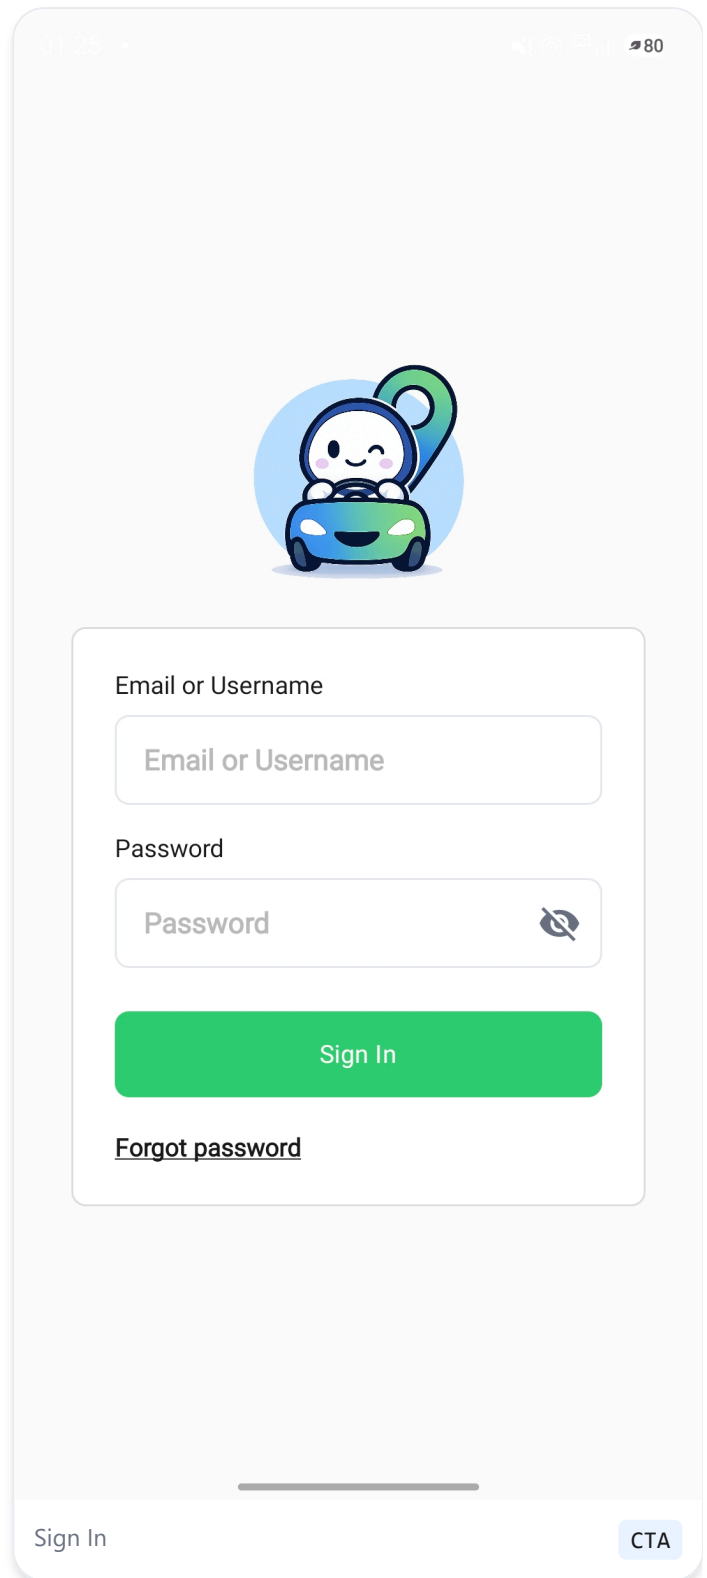

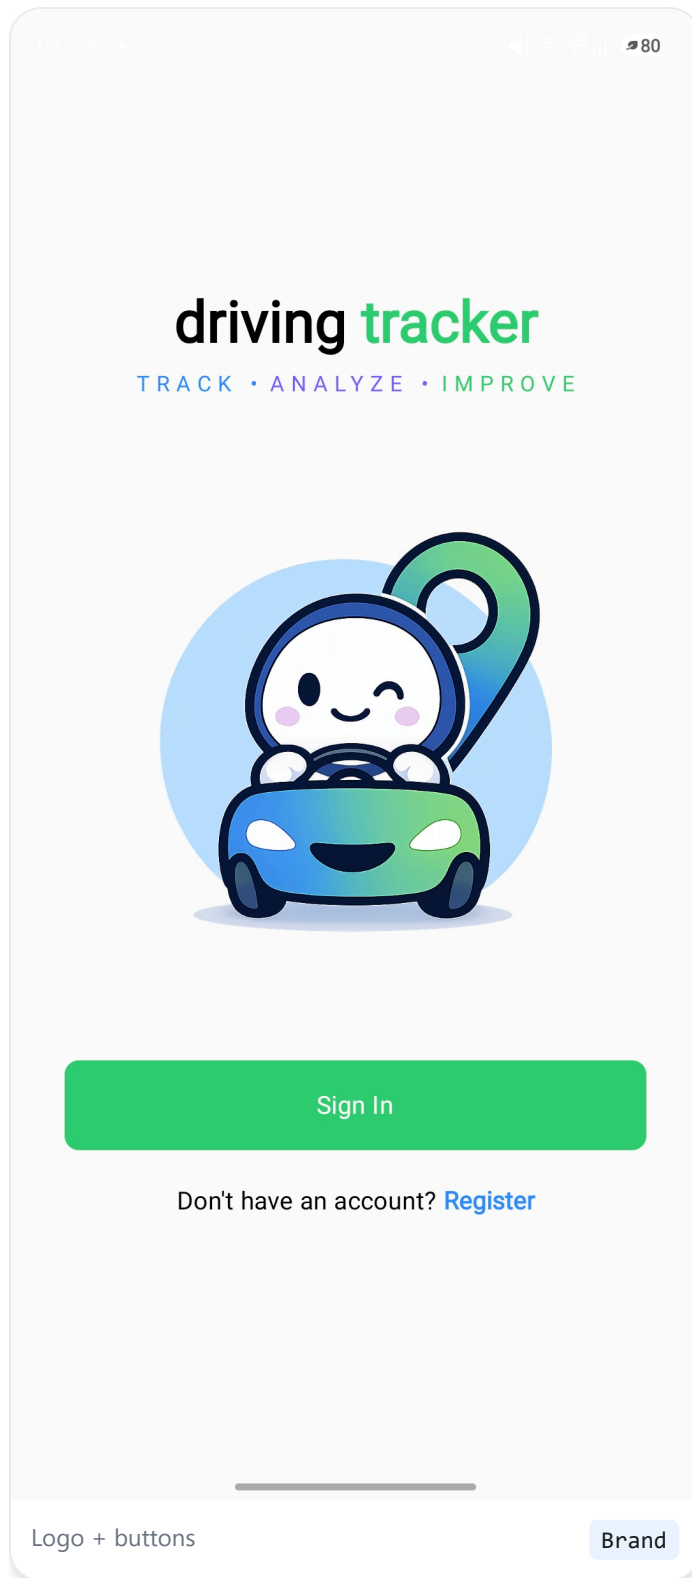

Cards + Score Motif

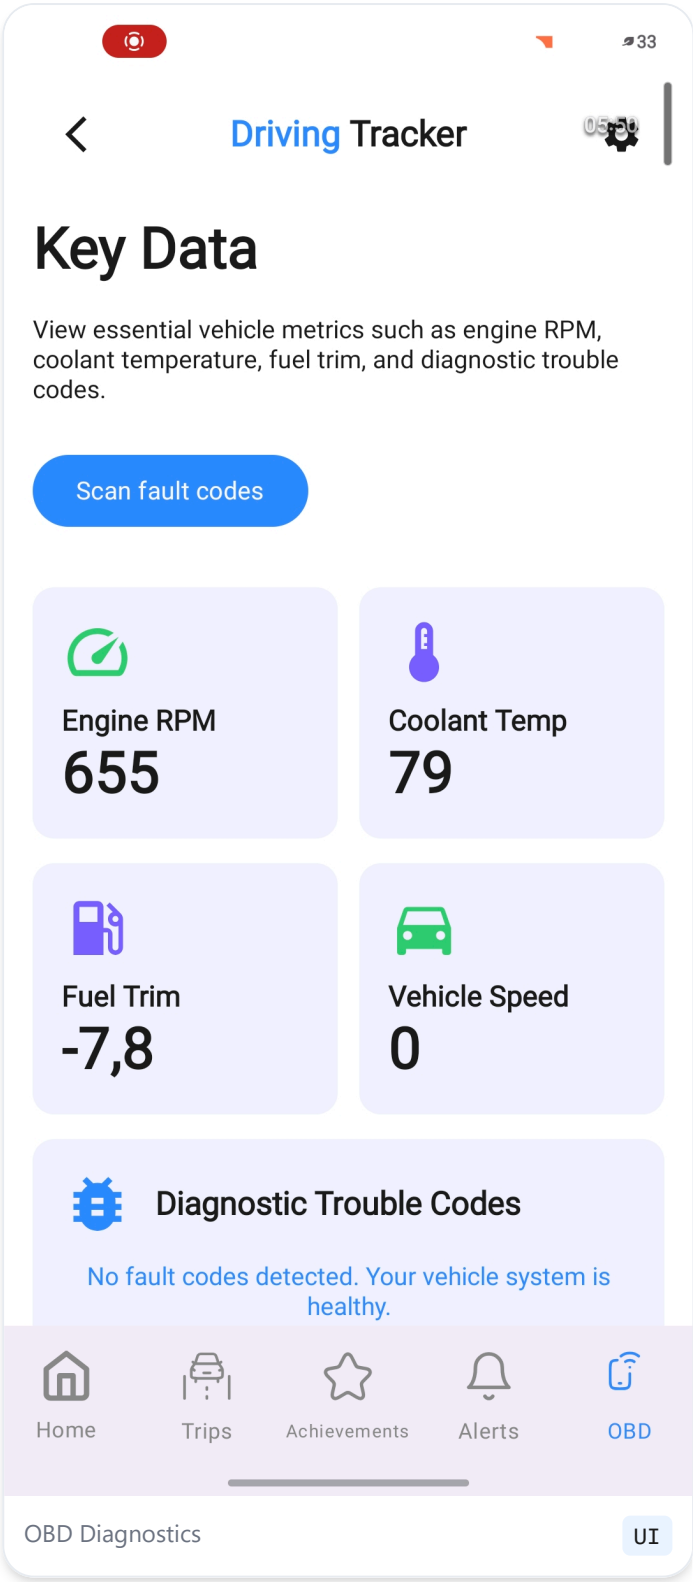

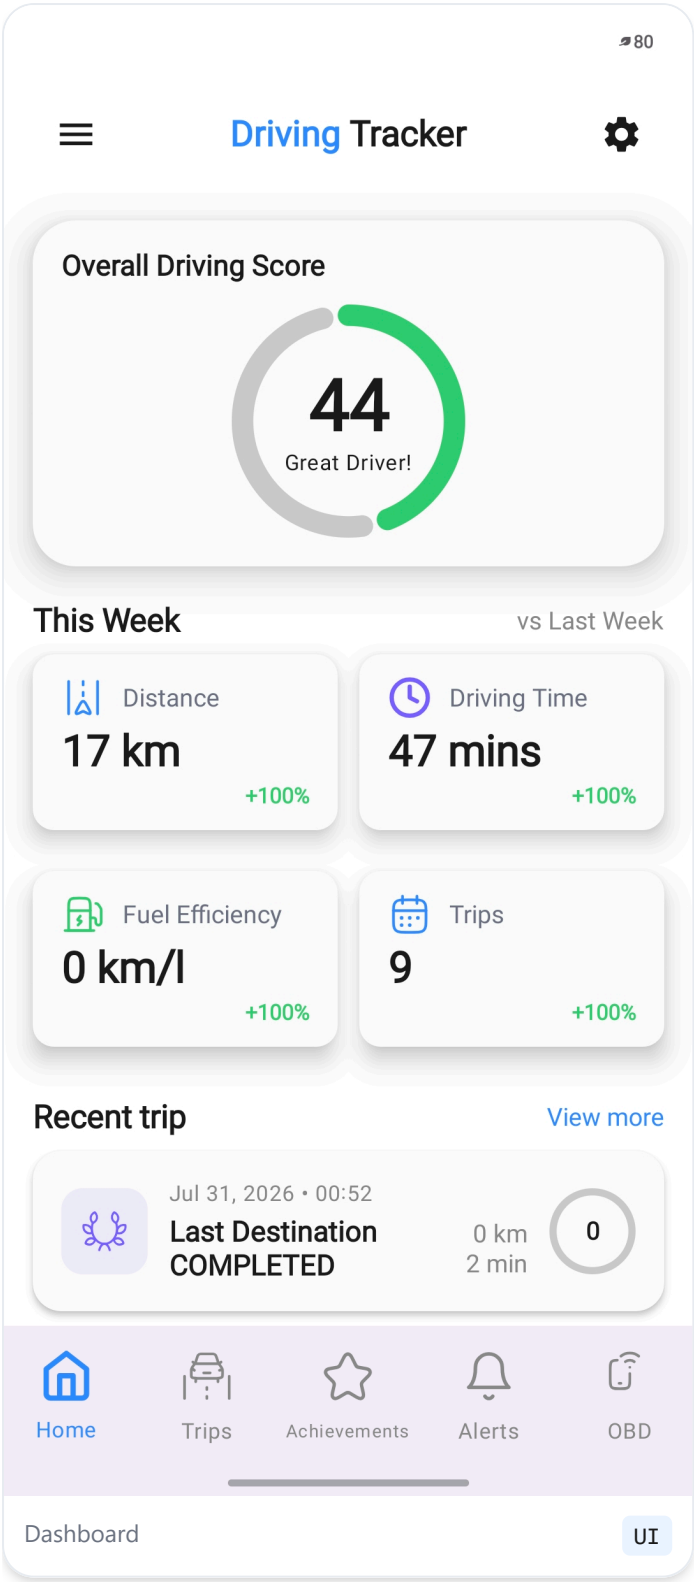

Cards use **CardWhite** rounded corners, and gentle elevation. Score rings use **Green**.

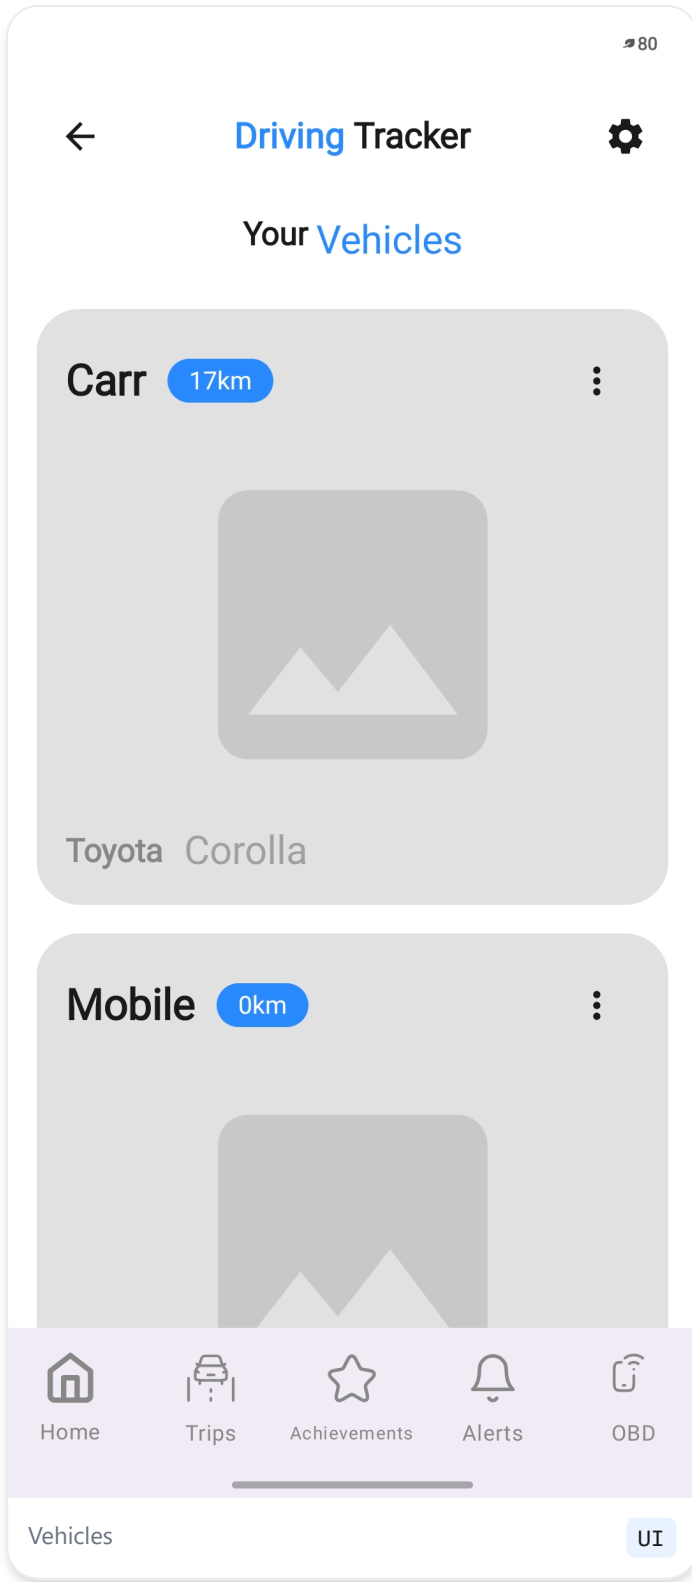

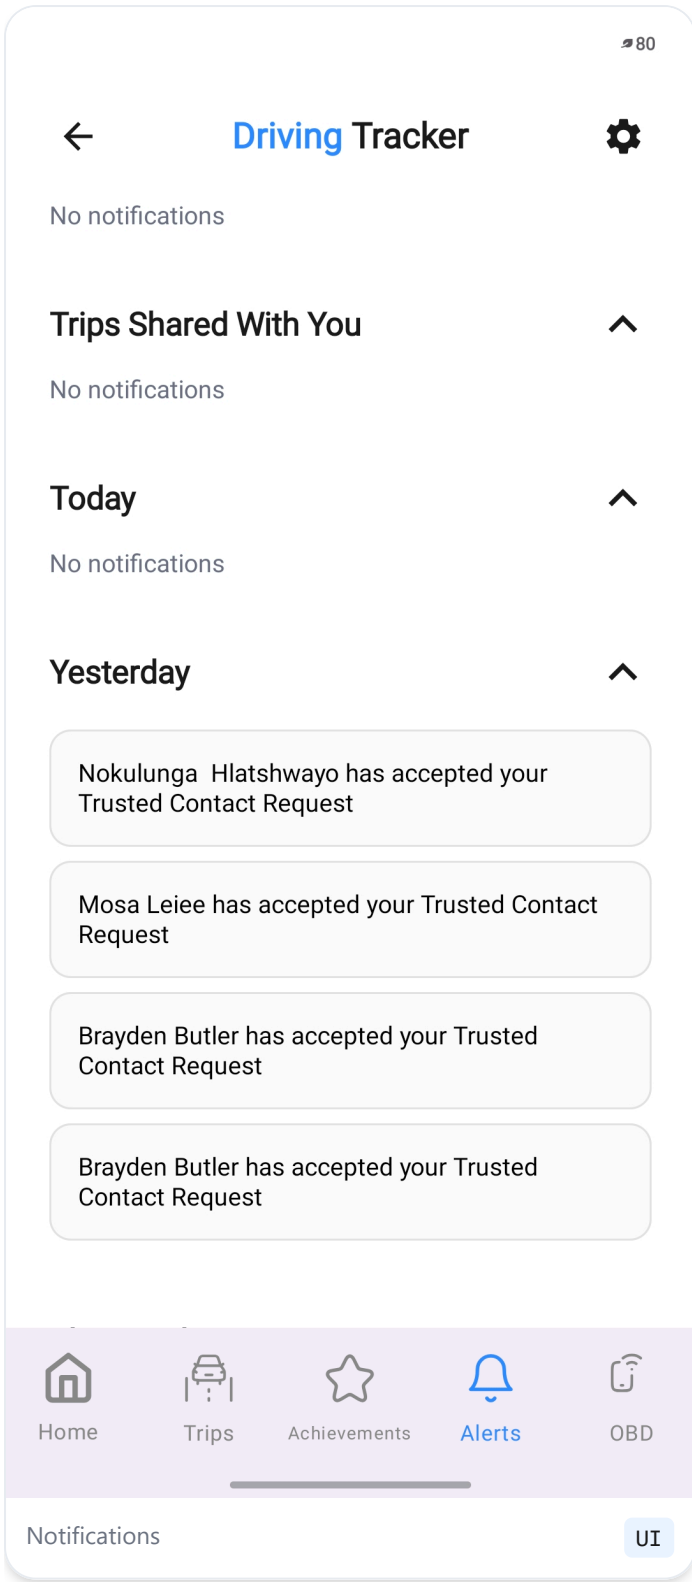

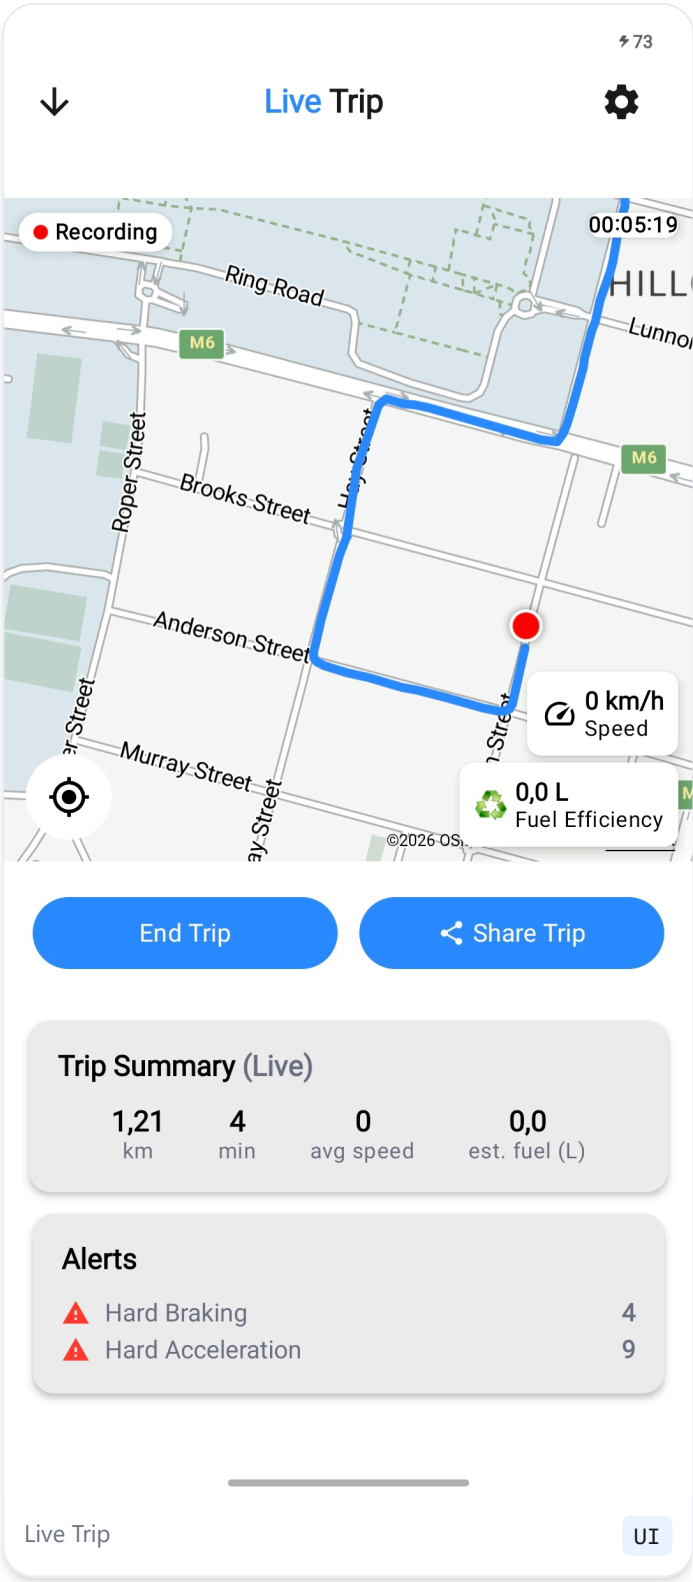

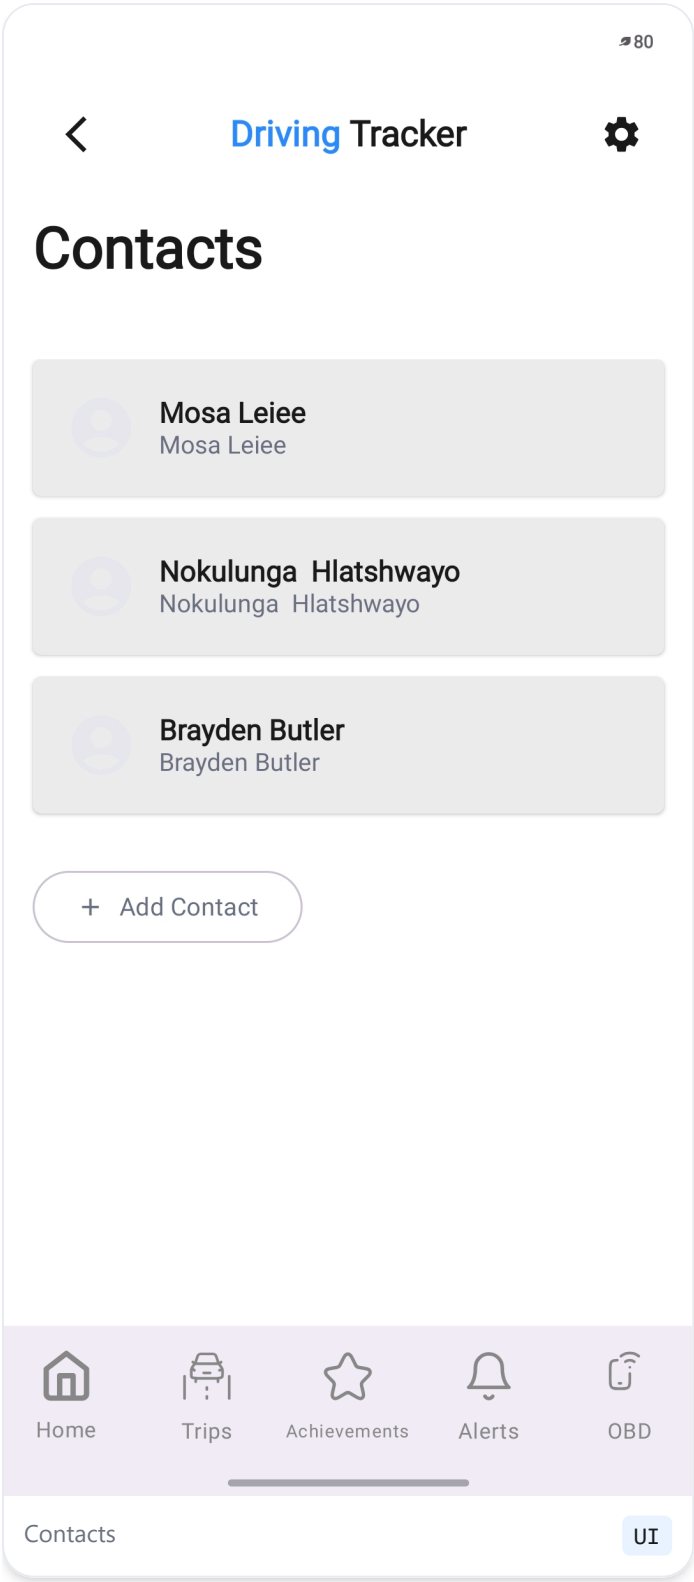

Real UI references (Screenshots)

Shows buttons, navigation, cards, and logo as they appear in-app

Style Guide Updates

Key differences from the first style guide

- **Beyond Static Print:** The guide is not just a static PDF anymore, it is now a web-native HTML reference.
- **Tailwind CSS:** The guide is now styled with Tailwind CSS instead of standard CSS.
- **Expanded UI Screenshots:** The UI reference grid has doubled from four to eight application screenshots with data that is not mocked.
- **Revised Component Guidelines:** Primary buttons now include **Blue/Green** filled options (introducing an "End Trip" blue button), while secondary actions specify **White** filled buttons with a blue outline.
- **Structure:** The bottom footer has been removed, header badge text was shortened, and the color summary has been reordered to "Blue/Purple/Green" to match the tagline on the app and landing page.
- **Background:** Blue and white gradient in the beginning instead of plain white.
