

Driving Tracker Brand Style Guide

A clean, safety-first visual system built around readable metrics, calm surfaces, and bright accents for interaction and performance feedback.

Personality: Clean • Modern • Friendly

Motif: Score rings + card-based layout

Core accents: Blue / Green / Purple

Driving Tracker is a mobile-based system designed to monitor and improve driving behaviour using smartphone sensors, GPS tracking, and OBD diagnostics. It analyses trips (speed, braking, acceleration, routes), generates insights for safety and fuel efficiency, scores drivers, and supports gamification (badges, leaderboards) plus fleet tracking concepts.

Colors

From `Color.kt` (tokens used across the UI)

Blue

#2D8CFF

Green

#2ECC71

Purple

#7861FF

Background

#FFFFFF

CardWhite

#FAFAFA

Border

#E6EAF0

Usage: **Blue** for navigation & links, **Green** for positive/primary actions and score rings, **Purple** for secondary accents and icons.
Accessibility: ensure text on tinted backgrounds meets contrast expectations.

Typography

Matches **Type.kt** scale (Material 3 / system font)

Logo & Iconography

Usage rules (sizing, spacing, placement)

Use the logo as the primary brand marker. Keep it clear, readable, and consistent across screens and print.

Logo sizing

Rule

Minimum printed width: **25mm**. Minimum digital width: **120px**. Avoid scaling that makes the wordmark unreadable.

Clear space

Rule

Keep padding around the logo equal to at least the height of the "t" in **tracker**. Do not crowd with other UI elements.

Backgrounds

Rule

Prefer **white** or **CardWhite**. Avoid placing the logo on busy images or strong gradients in print.

Icons

Rule

Use consistent Material icons (outlined/filled style consistently per screen). Accent icons may use **Blue/Purple/Green**; avoid random colors not in the palette.

Accessibility: icons must have meaningful **alt** text (or be explicitly decorative).

Components

Standard component styling (buttons, cards, navigation)

Buttons

Primary actions use **Green** filled buttons. Secondary actions use subtle outlines.

Matches the auth screens: filled green for main CTA, outlined for alternative.

Cards + Score Motif

Cards use **CardWhite**, rounded corners, and gentle elevation. Score rings use **Green** with a **Gray** track.
